

Screening Test/Interview Questions for Data Analyst (Remote) Position

Instructions: Please precede all your answers with the question you are answering.
Use acronyms only after you've explained them.
Use correct spelling and grammar.

Candidate's Name:

1. Are you currently employed? (Yes/No)
2. How do you define the role of a Remote Data Analyst?
3. What data analysis tools and technologies have you worked with?
4. What steps do you take when analyzing a large dataset to extract meaningful insights?
5. Can you describe a time when you identified a trend or anomaly in data that led to a business improvement?
6. How do you ensure data accuracy and integrity in your work?
7. How do you handle data cleaning and preparation?
8. How do you collaborate with remote teams, including stakeholders like business leaders, engineers, and other analysts?
9. What strategies do you use to stay productive and engaged while working remotely?
10. How do you approach tight deadlines or high-pressure situations in a data-driven role?
11. How do you stay updated on industry trends, data analytics tools, and best practices?
12. What does a typical workday as a Remote Data Analyst look like for you?
13. Why do you believe you are the best candidate for this role?

ABOUT US

We believe health care should be personal, accessible, and coordinated. At MainStreet Family Care, we are committed to helping you heal better and feel better.

FAST! MainStreet Family Care works hard to make sure you don't have to leave town to take care of your health. From urgent care to illness care to preventative care and now primary care, we deliver high-quality medical care for the entire family right here, right now; keeping you close to home and getting you back on your feet fast.

MISSION:- We Help Customers Feel Better. Fast.

VALUES:- Our values are summarized by three simple concepts:

- Heal and Feel – We treat both the illness/injury (HEAL) and the symptomatic problems to help you feel better fast (FEEL). We help our Customers feel better as soon as possible.
- WOW – We have a positive influence on all who we come in contact with. We are all in, all the time, every time. We go the extra mile. AND THEN SOME.
- We Are Family – We treat each other and YOU like family. We treat Customers with compassion, respect, and love.

JOB DESCRIPTION:

We are seeking a detail-oriented and analytical Remote Data Analyst to join our team.

In this role, you will be responsible for collecting, analyzing, and interpreting data to help drive strategic business decisions. You will work closely with cross-functional teams, including business leaders, engineers, and other analysts, to transform raw data into actionable insights.

This is a fully remote position, requiring strong communication skills, self-motivation, and the ability to collaborate effectively in a virtual environment.

RESPONSIBILITIES:

As a Remote Data Analyst, you will

- Collect, clean, and analyze large datasets from various sources to identify trends and insights.
- Use data visualization tools
- Write SQL queries to extract and manipulate data from databases.
- Conduct statistical analyses to support business decisions and measure performance.
- Work with stakeholders to define key metrics and track business performance.
- Identify data quality issues and implement processes to ensure accuracy and integrity.
- Collaborate with engineering and IT teams to improve data collection and storage processes.
- Stay updated on industry trends, emerging analytics tools, and best practices.

REQUIREMENTS:

- Bachelor's degree in a relevant field or equivalent experience
- Proficiency in SQL for data extraction and manipulation.
- Experience with data visualization tools
- Strong Excel skills, including pivot tables and advanced formulas.
- Understanding of statistical methods and data modeling.
- Ability to communicate complex data insights to non-technical stakeholders.
- Experience working remotely and collaborating across time zones is a plus.
